	and the control of th
	Comment. On the basis of previous reports it is believed that the
	Soviet Air Force unit at Bucharest-Pipera airfield is equipped with jet
	planes. However, jet aircraft with Rumanian national emblems are reported
	for the first time. Since the training of Rumanian pilots on jet aircraft
	has been under way for some time, it appears probable that Rumanian units
	will also gradually be equipped with jet planes.
	Statement of the statem
ŧ	Comment. This information confirms the assumption that a Rumanian
	pilot school is located at Sibiu airfield. Expansion work was previously
	reported. However, expansion may be limited
	because of the features of the surrounding terrain so that the field is
	not expected to become serviceable for jet aircraft.
